ES 335 / ES 678 · COURSE PROJECT

Project submission

Proposal responses are submitted directly in the classroom portal. The proposal form is open; final-project submission will open separately.

> **Proposal submission is open**
>
> Complete and submit your proposal in the in-site proposal form. Final-project submission will open separately.

Proposal · due October 15, 2026

Complete every response directly on the proposal form; no separate document upload is required. ES 335 pairs share one proposal record, while ES 678 students submit individually. Your registered project title, tools, name, and roll number are linked automatically.

Final project · due November 17, 2026

ES 335

- Live GitHub Pages website URL.
- GitHub source-repository URL, accessible to the instructor and graders.
- README with setup or rebuild steps, code location, and data access instructions.
- AI-use disclosure and citations for external material or code.

Submit one set of links for an individual or pair project. Both partners should verify

ES 678

Download the ES 678 LaTeX starter package (template, style file, and setup notes).

- Four-page, letter-size conference-style paper, written in LaTeX and submitted as PDF.
- LaTeX source files and bibliography.
- Code and reproducibility notes; provide data access instructions or a permitted data sample.

that the same final links are recorded.

- AI-use disclosure and citations for external material or code.

The research/depth component should be integrated into the same project and explained in the paper. The four-page course limit includes references; this is a course adaptation, not a conference submission.

Keep the public website or repository free of private data, credentials, and API keys. Final-project upload controls will be added when that submission window is opened.
